## **VIROTEC TARGETED FOR ENVIRONMENTAL REMEDIATION IN CHINA**

Virotec International Ltd ("Virotec") (ASX/AIM:VTI) announces it has signed a Memorandum of Understanding ("MOU") with International Environment Technology Solutions Pty Ltd ("IETS"), a company with a separate MOU with Chinese government agencies to provide management and technologies for the remediation of Dianchi Lake, in the People's Republic of China.

Executive Chairman, Brian Sheeran comments, "IETS advises Virotec that the Chinese Government are serious about cleaning the Dianchi Lake and that Chinese government agencies have budgeted a further US\$1.9 billion for its remediation. Previous expensive treatments have proved to be unsuccessful but we are confident that the challenge is well within the capabilities of Virotec and our exclusive Bauxsol™ Technology."

The Dianchi Lake in Kunming, Yunnan, China is approximately 300 square kilometers in size and is suffering from the effects of pollution from sewerage and industrial effluents and intensive horticulture. IETS specializes in environmental business, particularly in the cleaning up of lakes, rivers and waterways in China.

Mr Brian Sheeran concludes, "This is a very exciting development for the company and its Bauxsol™ Technology. We expect to finalize a formal agreement with IETS in the next eight weeks."

### ***Notes to editors***

*Bauxsol™ Technology is a fast and cost-effective green technology that simultaneously neutralises acid and extracts heavy metals from contaminated water and soils.*
